

**Re: E.H. Butland Corporation**

To Whom It May Concern:

I am the Director of Engineering and Facilities at Antelope Valley Hospital. E.H. Butland Corporation has completed several projects for the hospital over the last 15 years. They are very experienced in working with OSHPD which has proven to be a real advantage to the hospital.

A few projects that E.H. Butland Corporation have completed for us are:

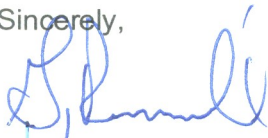

- Emergency Room Addition
- Free-standing MRI Building
- 5<sup>th</sup> Floor Medical Surgery
- X-Ray Room

All of E.H. Butland Corporation's employees and subcontractors understand OSHPD and respect their system. They work well with Architects, IORs, and the State Fire Marshall. All of our inspections, although difficult, went well. All the projects E.H. Butland Corporation completed for us were constructed, inspected and occupied ahead of schedule.

E.H. Butland Corporation is a qualified OSHPD contractor. I recommend that you consider E.H. Butland Corporation as a serious candidate for any upcoming projects.

Should you need additional specifics regarding E.H. Butland's performance, please do not hesitate to call.

Sincerely,

George Rowerdink  
Director of Engineering and Facilities  
Antelope Valley Healthcare District
